

ADARSH UMESH

+1 (747) 333-4258 | adarshu.career@gmail.com | Northridge, CA | LinkedIn | GitHub
Business Analyst | Product & Project Management | Agile Delivery | AI-Driven Decision Making

PROFESSIONAL SUMMARY

Business Analyst and Project Manager with a software engineering foundation, bringing hands-on experience across requirements gathering, Agile delivery, stakeholder management, and data analysis. Proven track record designing and personally building AI-driven automation (n8n, NVIDIA Nemotron, Ollama) deployed into live business operations, alongside a full-stack Software Developer and Scrum Master background. Graduate training in Engineering Management supports a technical, data-driven approach to bridging business needs and technology solutions, with growing depth in applied AI and Generative AI product strategy.

PROFESSIONAL EXPERIENCE

Business Analyst | ShrinQ Consulting Group Inc.

Jul 2026 – Present

Remote (Northridge, CA)

- Gather, analyze, and document business requirements in collaboration with stakeholders, ensuring proposed solutions align with organizational goals and project objectives.
- Partner with development teams to define functional specifications for web applications, REST APIs, microservices, and system integrations using Agile methodologies.
- Create process flows, user stories, wireframes, and acceptance criteria using Figma and JIRA to support efficient, on-time project delivery.
- Analyze business data and performance metrics using SQL and Tableau to identify trends, generate actionable insights, and recommend process improvements, incorporating AI-driven analytics tools to accelerate pattern discovery.
- Coordinate sprint planning, backlog refinement, risk management, and stakeholder communication to ensure timely delivery of high-quality solutions.
- Support solution testing and validation by partnering with QA teams, reviewing test results, and confirming applications meet business requirements prior to deployment.

Project Manager | 9 Tree Solution

Aug 2025 – Jul 2026

Full-Time Internship | Remote (Katy, TX)

- Served as end-to-end project manager for one of two dental laboratories formed by a merger to jointly service the greater Los Angeles area, overseeing manufacturing coordination (crowns, bridges, veneers, and implants across zirconia, gold, and other materials) and order fulfillment for 20+ partner clinics.
- Personally designed and built a self-hosted n8n automation (NVIDIA Nemotron with local Ollama failover) to triage clinic requests by urgency and delivery timeline, assigning unique case IDs for traceability; cross-referenced requests across clinics to batch production runs, reducing costly one-off manufacturing.
- Identified mail-based physical impression delays as a key bottleneck and led rollout of a two-tier intraoral scanner program — sourced from an overseas manufacturer with the lab as authorized U.S. reseller — offering outright purchase or scanners financed against committed monthly case volume with tiered pricing; achieved 80–85% clinic adoption while eliminating manual impression-to-STL conversion.
- Built an AI-assisted, Kanban-style case-tracking dashboard for a 4–5 person design team, giving each designer individual case tracking and giving lab leadership real-time visibility into work-in-progress and case status across the team.
- Operated automation infrastructure on UPS-backed, always-on local hardware with scheduled backups to Google Drive, and proposed a QR-code-based inventory tracking concept for the manufacturing warehouse.

Software Developer and Scrum Master | GlobalLogic India Pvt. Ltd.

Dec 2020 – Jul 2023

Contractor to iCIMS

- Progressed from Trainee Software Engineer to Senior Software Engineer over three years, taking on Scrum Master responsibilities alongside full-stack development.
- Facilitated Scrum ceremonies for a cross-functional team of 10+, coaching the team on Agile practices to improve sprint velocity by 25% and reduce blockers by 30%.
- Engineered modular, user-interactive web applications using React.js, Node.js, and Java Spring Boot microservices with a micro-frontend architecture, improving scalability and maintainability by 40%.
- Implemented CI/CD pipelines with Jenkins and led biweekly production deployments to AWS, increasing release cadence and deployment velocity.
- Built comprehensive test suites with Jest, Mocha, and JUnit, achieving 95% test coverage and reducing production bugs.
- Conducted performance testing with Apache JMeter, validating stability for 5,000+ concurrent users.
- Championed use of JIRA, Confluence, GitHub, and Looker for sprint tracking, documentation, and executive reporting.

Software Engineer Trainee | R-Financial

Jul 2019 – Nov 2020

India

- Developed backend services in Java and Spring Boot for a cloud-based digital lending application, reducing loan approval processing time by over 30% through optimized data handling and API design.
- Built internal dashboards and admin tools using JavaScript, HTML5, and RESTful APIs to visualize transaction statuses and system errors, cutting support tickets from operations teams by 40%.
- Built SQL queries and scheduled data pipelines supporting financial reporting and compliance tracking for risk management and finance teams.

PROJECTS

Smart Pothole Detection — Led a team of 4 to design and implement a sensor and computer-vision-based pothole detection and prediction model, achieving 72% accuracy.

Robot Movement Automation with Computer Vision — Designed an autonomous robot navigation system integrating ESP8266, NodeMCU, OpenCV, Unity3D, and Arduino IDE using SIFT feature matching, reducing system latency by 30% and improving industrial process efficiency by 45%.

EDUCATION

Master of Science in Engineering Management

Aug 2023 – May 2025

California State University, Northridge | GPA: 3.43 / 4.0

Coursework: Product Design, Leadership of Engineering Professionals, Operations Management, Lean Manufacturing, Decision Tools, Tech Entrepreneurship, Data Analytics, Data Visualization, Engineering Economics, Project Management

Bachelor of Engineering in Electronics and Communication

Aug 2016 – Aug 2020

CMR Institute of Technology, India | GPA: 6.71 / 10

SKILLS

AI & Emerging Tech: Generative AI, Prompt Engineering, AI Product Strategy, AI-Driven Analytics, AI-Augmented Workflows, LLM Applications, NVIDIA NemoTron, Ollama, n8n Workflow Automation

Business Analysis: Requirements Gathering, Process Mapping, User Stories, Wireframing (Figma), Acceptance Criteria, Data Analysis (SQL, Tableau)

PM & Agile Tools: JIRA, Agile, Scrum, Waterfall, Sprint Planning, Risk Management, Stakeholder Management, Vendor Management, Kanban Systems

Programming: Java, JavaScript (ES6), SQL, Python, C++, HTML5, CSS3, JSON, Bash

Frameworks & Tech: React.js, Redux, Node.js, Java Spring Boot, REST APIs, Microservices, Micro-Frontend Architecture, Material UI, Bootstrap, JWT Auth, OAuth, Git, Postman, Bitbucket, PostgreSQL

Cloud & DevOps: AWS, CI/CD Pipelines, Jenkins, Docker, GitHub Actions

Other: 3Shape CAD, NPM, Yarn, Google Suite, VS Code

PROFESSIONAL DEVELOPMENT

Outskill AI Accelerator Program: In progress — applied Generative AI, prompt engineering, and AI-driven product and business strategy.

CERTIFICATIONS

Certified Scrum Master (CSM) • Technical Product Management • Product Analytics Certification • Enterprise Design Thinking Practitioner • React.js Essential Training • Scrum: The Basics • Excel Essential Training
